

Press Release

"TWICO CONVERGENCE"

Crypto Fintech Investments Conference

*Traditional and innovative fundraising tools
at the service of new business projects*

Milano, October 15th 2018. *Twico Convergence* was held in Milan on 11th and 12th October 2018 at Museo Nazionale della Scienza e della Tecnologia; it was the first Italian *Investor Conference* aiming to create a platform for meeting and relationship development between investors and entrepreneurs, to bridge the gap between ideas, market and money in the fintech and crypto domain.

The conference had involved high-profile figures of Venture Capital domain, that didn't hide their skepticism about the financial innovation brought by blockchain technology and cryptocurrencies. Italian and international companies, involved in the fundraising phase, got on stage and presented their business projects, with opportunities for indepth examination which allowed the audience to perceive the Crypto Fintech magnitude and flexibility.

The two-day conference outlined a comprehensive picture of the digital innovation ongoing in several business sectors, from Fintech to AI, from intellectual property to PA; in addition, it dealt also with the eventual effects in unconventional markets, such as art and music, that were the central topics discussed in two round tables enriched by several experts which described the current market trends.

There was no lack of cultural and networking moments that made Twico Convergence a unique event.

The conference was promoted by Independent Investment Society, the Twice group Association which encourages the spread of innovative financial culture.
